PROFILE SUMMARY

Computer Science fresh graduate and **Full Stack Developer Intern** with strong hands-on experience in building scalable, production-ready web applications. Proficient in **JavaScript, React.js, Node.js, Express.js, Java Spring Boot, PHP, and SQL/NoSQL databases**. Experienced in developing **REST APIs, real-time applications (Socket.io), authentication (JWT), and cloud deployment**. Familiar with **Git-based workflows and Agile development**. Highly motivated, fast learner, and eager to contribute to real-world software projects as a Software Engineer Intern.

EDUCATIONAL QUALIFICATIONS

B.Sc. in Physical Sciences (Specializing in Computer Science) – University of Kelaniya, Sri Lanka (2021 – 2025)
Majors: **Computer Science, Pure Mathematics, Chemistry** | GPA: 3.13 / 4.0
Full Stack Developer Training – DP Education IT Campus & Coding School (2023 – Present)

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, Python, PHP, C, C#, TypeScript
Frontend: React.js, Next.js (basics), HTML5, CSS3, Tailwind CSS , Bootstrap,
Backend: Node.js, Express.js, Python (FastAPI basics), Java Spring Boot, REST APIs, Socket.io, MVC structure
Databases: MongoDB, MySQL, SQL Server, PostgreSQL (basic)
DevOps & Tools: Git/GitHub, Git/GitHub, Docker, AWS EC2,Postman, Figma (UI/UX basics)
Core Expertise: API Integration, JWT Authentication, WebSockets, Cloud Deployment, Real-time Systems, OOP, DSA, Responsive Design, Cloud deployment (AWS EC2, Render, Vercel)

PROJECTS

Online Shopping Center App (2025) – MERN Stack + Socket.io
React | Node.js | Express | MongoDB | JWT | Socket.io | Cloud Deployment | CI and CD

- Full-stack **e-commerce platform** with **JWT authentication**, product and cart management, and secure payment integration.
- Implemented **real-time order status notification**s using Socket.io.
- Included Admin/User roles and order tracking system.
- Designed REST APIs and deployed frontend on Vercel: https://online-shopping-frontendzeta.vercel.app/

Computer Shop Web Application (2025) – MERN Stack + Payhere
Real-time Chat | Cloudinary | OTP + JWT Auth | Groups | Media Upload

- Developed a **modern e-commerce platform** for a computer shop with a **responsive** UI using React and Vite. Data base as MongoDB
- Built backend APIs with **Node.js** and **Express** for products, orders, and payments. **Supabase** as the storage
- GitHub: https://www.computer.ekdvs.xyz

Travel Planning Website (The Ceylon Traveler) – React + Spring Boot + MongoDB

- Travel package booking system with **payment gateway** integration and scalable backend.
- **Technologies:** React.js, Spring Boot, MongoDB.
- Live Demo: https://ceylon-travelernetlifyapp.vercel.app/

Wedding Planning Website (Emerald Weddings) – PHP, MySQL

- **Booking system** with automated email notifications using PHPMailer.
- **Technologies:** PHP, MySQL, HTML, CSS, JavaScript.
- Live Demo: https://weddingplaning.rf.gd/

Weather Forecast Web App – React, TypeScript, OpenWeather API

- Displays **real-time weather data** with responsive UI and REST API integration
- Technologies: React.js, TypeScript, REST APIs.
- Live Demo: https://wearther-app-three.vercel.app/

Rent-a-Car Service System (2024) – C#, SQL

- **Desktop application** for vehicle rentals, returns, and customer management.
- Technologies: C#, .NET, SQL Server.

Online Flower Selling Website (2024) – PHP, JavaScript

- **E-commerce platform** with shopping cart and order management.
- Technologies: PHP, MySQL, JavaScript.

CERTIFICATIONS

- **Full Stack Developer Course** – DP Education IT Campus & Coding School (2023)
- **AWS Cloud Practitioner (Coursera)** – Completed
- **Java Programming (Simplilearn)** – Completed

EXTRACURRICULAR ACTIVITIES

- **Member** – Mathematics Student Society, University of Kelaniya
- **Participant** – Hackathons & coding competitions
- **Volunteer** – University technical symposiums

SOFT SKILLS

Teamwork | Problem-Solving | Communication | Adaptability | Time Management | Fast Learner
